

Photon Energy Group is a group of companies with a shared mission: making clean energy, clean water and clean environments accessible to everyone.

Photon Energy provides comprehensive solutions that support the generation of clean energy and the integration of renewables into the electrical grid. **Photon Water** offers water treatment and management solutions, and **Photon Remediation** deploys advanced technology to remove contamination from all environments.

A publicly traded company operating in over 15 countries across two continents, we combine a global outlook with localised expertise.

Since our founding in 2008, we've expanded to a team of more than 400 employees around the world. And we're committed to fostering a culture of shared values and sense of purpose as we continue to grow.

Electrotechnician – Photovoltaic Power Plants

Do you want to make a real impact on the clean energy sector? We are looking for a dedicated professional to join our **Operations and Maintenance** team.

In this role of **Electrotechnician**, you will play a key role in ensuring the smooth operation of photovoltaic power plants. You will manage technical aspects across electrical, IT, and mechanical disciplines, ensuring optimal performance for our installations.

Key Responsibilities

- ▶ Implementing and maintaining monitoring systems at photovoltaic power plants to ensure operational efficiency
- ▶ Testing new hardware/software systems within the power plant infrastructure
- ▶ Programming and performing regular maintenance on PLC drivers
- ▶ Collaborating with technical managers to resolve technical challenges
- ▶ Advising technical solutions to improve our systems and the operational efficiency of photovoltaic power plants
- ▶ Creating, updating, and managing technical documentation, ensuring accuracy and compliance with industry standards
- ▶ Providing technical support to the control room and service technicians working across power plants
- ▶ Communicating with customers and providing professional support and information

Qualifications and Experience

- ▶ Minimum 2 years of experience as an electrician in the renewable energy or industrial sector
- ▶ Electrotechnical secondary education
- ▶ Valid over 1 kV Polish Electrical Association certificate (SEP D, E) is an advantage
- ▶ Strong technical knowledge in electrical systems, analysis, and troubleshooting
- ▶ Knowledge of SCADA systems is an advantage
- ▶ Driving license and willingness to travel – **30% of the time you will be travelling to our customers**
- ▶ Good communication skills to properly communicate technical issues to our customers
- ▶ Fluent Polish; English at a communicative level for internal communication with colleagues

Our Offer

- ▶ An interesting job at a fast-growing global organisation in the promising fields of renewable energy, environmental remediation and clean water technology
- ▶ Indefinite full-time employment contract
- ▶ 20/26 days of vacation (based on age), 1 CSR day (a working day dedicated to a non-profit organisation aligned with the Group's mission and values)
- ▶ Medicovert SPORT allowance (30 PLN, rest is paid by employee based on chosen package)
- ▶ Medical package allowance and meal allowance (Edenred card, 300 PLN / month)
- ▶ Group Insurance
- ▶ Laptop, mobile phone, company car

If you are interested in the position and fulfil the above requirements, please apply online or send your CV to careers@photonenergy.com.
