

Photon Energy is a leading solar energy solutions and services company covering the entire lifecycle of solar energy systems. We have built and commissioned solar power plants with a combined capacity of over 100 MWp across Europe and Australia, of which over 70 MWp are part of our own portfolio. Photon Energy is headquartered in Amsterdam, the Netherlands and listed on the Warsaw Stock Exchange under the ticker symbol 'PEN'. The company has offices in Europe, Australia and South America. For more information, please visit www.photonenergy.com.

To strengthen our team, we're looking to fill the following position based in our Sydney office:

Electrical Engineer

Well-rounded Electrical Engineer with design, project management and EPC experience in the power and or renewable energy industry, located in Sydney, Australia.

The candidate should have existing experience in working on solar and or renewable energy projects and be able to manage processes from design, engineering, procurement through to commissioning. They will be well informed and keep abreast of latest technological trends and be well versed in best industry practices and state of the art design and engineering. The candidate must have an in-depth knowledge of relevant standards and regulations.

- ▶ Experience in engineering and commissioning support to solar PV, energy storage and grid stability systems for power plants.
- ▶ Practical knowledge in MW scale solar system engineering designs from conceptual stage to advanced detail designs.
- ▶ Asset management and operations + QA & QC + HV operating and switching
- ▶ Lead Electrical Engineer experience with excellent project management skills.
- ▶ Can work independently as well as collaboratively within a team.

Please send a letter of interest explaining why you are well suited for the position and your resume to careers.aus@photonenergy.com.
